TEKA - Spark pre separator 7000 - 12000

Metal working produces not only respirable pollutants, but also sparks and glowing parts – such as during grinding or cutting. The special diversion of the polluted air inside the unit guides heavy and especially glowing parts into the water.

Standard equipment:
- Powder-coated steel plate housing
- Inspection glass for monitoring the water level
- Control and maintenance door with snap-fasteners
- Collecting container
- Water connection
- Level control
- Transition piece for ducting
- Shut-off valve
