Welding training bench

The robust welding table has been specially developed for use in industrial companies as well as training and educational centres. Thanks to its solid welded construction made of high-quality profile steel, it offers a durable and safe working surface for a wide range of welding tasks.

The table allows welding both on a resistant bar grate and on fireclay bricks, ensuring flexible adaptation to different requirements. The easy assembly saves valuable setup time. Optionally, a welding position fixture can be integrated to carry out realistic welding exercises in all positions.

On request, custom dimensions are available so that the welding table can be perfectly adapted to your individual operating conditions.

Properties

Weight (kg):	28
Width (mm):	600
Depth (mm):	635
Height (mm):	800
Colour:	RAL 7016
