# Suction arm, 3m, diam.150mm

*Description*

# Suction arm, 3m, diam.150mm

The suction arm consists of an internal linkage made of aluminium. Due to the convenient arrangement of the springs it is very easy to move the suction arm in every requested position. It is possible to turn the suction hood with integrated throttle valve in every direction.

The delivery includes a low-abrasion self-lubricating flange.

*Properties*

Length (mm):	3,000
Diameter (mm):	150
