

The air purifiers

Suction crane

Description

Suction crane

Due to the two part supporting construction it is possible to attach tools.
At the first outrigger, you can attach charges up to a weight of 50 kg (e.g. a mechanical wire travel). The second outrigger can be charged with up to 10 kg (e.g. tube package).
The internal construction of the telescopic arm allows a continuous regulation at every height.

Properties

Length (mm):	6,000
Diameter (mm):	250
