Description

Filter unit "dustoo" 230V/50Hz

The **TEKA dustoo** is a mobile high-vacuum cartridge filter unit in a portable and wheeled design. It is particularly suitable for welding guns with integrated extraction and also captures fumes and dust at specific points via an extraction nozzle.

At a glance

- **High vacuum:** two powerful high-pressure turbines, suction power continuously adjustable via potentiometer
- **Filtration:** filter cartridge with surface filtration
- **Connection:** two intake spigots, one can be closed with a blanking cover
- **Mobile:** portable and on wheels

Your benefits

- **Surface filtration:** Particles settle on the cartridge and do not penetrate the filter material.
- **Automatic cleaning:** When compressed air is connected, a timer cleans the cartridge at the set intervals.
- **Change when needed:** The filter monitoring indicates when the cartridge should be changed.
- **Spark protection:** integrated in the unit.
- **Easy disposal:** The cleaned-off dust collects in a dust tray.
- **Robust design:** sheet steel, powder-coated inside and out.

Options

A wide range of extraction nozzles and hoses.

Supplied ready to plug in with power cable. The operating instructions are available in the Downloads tab. Our overview page shows more systems for welding fume extraction.

Properties

Blower type:	Carbon brush turbine
