Description

ViroLine Compac S

The ViroLine Compac reliably removes fine dust and germs such as bacteria and viruses from the air. The device reduces pathogens in the air in the long term, lowers the risk of infection and promotes the well-being of people in the room.

The mobile room air purifier is the intelligent solution for everyone who is looking for a device that discreetly and reliably emits clean and unpolluted air - and all this at an unbeatable price/performance ratio.

It is therefore perfect for use in hotels, restaurants, medical practices, hairdressing salons, nursing homes, schools and daycare centres.

Ambient air is fed into the unit from above, passed through a HEPA filter of class H14 (certified according to DIN EN 1822). This high-performance filter has shown to separate out more than 99.995 percent of all fine suspended particles larger than 0.1 µm and are so effective that they are also used in hospitals and laboratories.

The motor will be controlled by an integrated frequency converter. Hereby the performance can be adjusted individually.

A further feature is that the unit can be easily moved around in the room thanks to its castors, so that it can always be placed where required.

The ViroLine Compac is ready for use directly out of the box. Simply connect the plug and turn it on at the power button. If necessary, the filter can be easily removed and replaced.

Properties

Main filter quantity:	1
Volumetric flow (m³/h):	one thousand
Engine power (kW):	0.75
Supply voltage (V):	230
Connection frequency (Hz):	50
main filter:	H14
Filter class:	H14
Separation efficiency (%):	99.995
Sound level (dB(A)):	39–65
Weight (kg):	90
Width (mm):	580
Depth (mm):	580
Height (mm):	906
Colour:	RAL 5003, 7035
