Product No.: 56220

Description

Suction table

The **TEKA extraction table with downdraft extraction** captures fumes and dust directly at the workpiece and extracts them downwards, for example during manual plasma cutting, welding and grinding. The table is connected to an extraction system or a fan via a connection spigot. This wide version offers plenty of surface area for larger workpieces.

At a glance

- **Downdraft extraction:** extraction downwards through the table top
- **Baffle plate:** distributes the pollutants in the table and calms the air flow
- **Table top:** flat steel bars as a robust work surface
- **Construction:** sturdy welded design, outer surfaces with multi-layer coating

Your benefits

- **Even extraction:** The integrated baffle plate distributes the pollutants in the table and calms the air flow. This ensures extraction across the entire table top.
- **Robust work surface:** The flat steel table top holds workpieces securely and is built for everyday workshop use.
- **Durable:** The sturdy welded construction and the multi-layer coating of the outer surfaces are designed for long service.
- **Adaptable:** A firebrick table top is available as an option. Special dimensions are available on request.

Applications

Manual plasma cutting, welding and grinding workstations in workshops and production.

The table is available in three widths; see the Properties tab for dimensions. We will be happy to advise you on choosing the right filter system or fan. Our overview page shows suitable systems for welding fume extraction.

Properties

Weight (kg):	110
Width (mm):	1,200
Depth (mm):	635
Height (mm):	800
Colour:	RAL 7016

Accessories

Suction arm, 2m, diam.150mm
Product No.: 976010001

Suction arm, 3m, diam.150mm
Product No.: 976020001
