Product No.: 97626

Description

Telescopic suction arm, diam.150mm

The **TEKA telescopic extraction arm** is particularly suitable for capturing pollutants at permanently installed welding tables, for example in welding booths. Thanks to its small footprint, it is also well suited to training centres. This version has external joints and a plastic extraction hood with damper.

At a glance

- **Adjustment:** continuously height-adjustable, swivels forwards and rotates
- **Telescoping:** low-wear, without counterweights, with reinforcing profile against bending
- **Hose:** PVC-coated polyester fabric hose
- **Extraction hood:** swivels in all directions

Your benefits

- **Low maintenance:** The hose runs alongside the telescopic rods, which are outside the airflow.
- **Less fan power:** With external joints, fumes are captured with considerably lower fan power, which reduces the noise level.

Scope of delivery

Wall bracket with connection spigot.

Options

Lighting kit for the extraction hood, spark guard, wall bracket with counter spigot for TEKA fans.

The operating instructions are available in the Downloads tab. All versions are shown in our overview of telescopic extraction arms . Free shipping.

Properties

Length (mm):	1,200 – 2,060
Diameter (mm):	150
