TEKA

Telescopic suction arm, diam.150mm

(Page: 1 for product 97626)

Description

Telescopic suction arm, diam.150mm

The telescopic suction arm is extensible from 1.20 to 2.06 m in its length and fitted with a metal hood with built-in throttle. Due to the little space required, they are optimally appropriate to be applied in training and education centres. The version fitted with external joints guarantees a fume extraction with considerably lower fan performance. This reduces the noise level.

Properties

Length (mm):	1,200 – 2,060
Diameter (mm):	150
