ALSIDENT Suction arm, 50 mm

Tubes and extractor tube are made of anodized aluminum, the connection and the joints of polypropylene and the flexible hose of plastic. The suction arm has been developed for the local exhaust with no special requirements for chemical resistance or the conductivity.

An internal spring gives this suction arm a self supporting construction and it has a very high flexibility. By turning the flexible hose it can be tighten up in order to maintain the position.

The extraction arm can be mounted directly through the table or with a table bracket for a mobile installation.

The installation is quickly and easily. It is easy to disassemble the arm and reassemble it after cleaning without the need for tools. Using high quality materials ensures durability and low maintenance. The extraction arm is equipped with a regulating damper to open/close.

Properties

Length [mm]:	< 78
Weight [kg]:	0
Diameter [mm]:	25
Joints number:	2
Joints colour:	black
Mounting type, joints colour:	Table mounting
Version:	Aluminium

Accessories

Table bracket, black, DN 50 mm
