Product No.: 50123050

Description

ALSIDENT Suction arm, 50 mm, flexible

The pipe and pipe nozzle are made of anodised aluminium, the connection is made of polypropylene and the flexible hose is made of plastic. The extraction arm was developed for spot extraction without any special requirements in terms of chemical resistance or conductivity.
With an internal spring, the extraction arm has a self-supporting construction and can be easily adjusted to different positions and therefore adapted to different working situations. Turning the flexible hose tensions it and keeps it in the desired position.
The extraction arm can be mounted directly through the table or, for mobile installations, on the edge of the table using a table holder.
Installation is quick and easy. The extraction arm can be dismantled and reassembled without tools for cleaning.
The use of high-quality materials ensures a long service life and low maintenance.

Properties

Mounting type:	Table mounting
Number of joints:	0
Length (mm):	600
Diameter (mm):	50
Farbe Gelenke:	black
Ausführung:	aluminium

Accessories

Table bracket, black, DN 50 mm
Product No.: 25010050
