# Extractor tube / antistatic

*Description*

# Extractor tube / antistatic

The angled shape of the extractor tube ensures high efficiency as the extractor tube gets close to the source without obstructing the work process.

The angled shape of the extractor tube ensures high efficiency as the extractor tube gets close to the source without obstructing the work process.

The extractor tube made of anodized aluminum has been developed for the local exhaust with no special requirements for chemical resistance or the conductivity.

The tube is also provided with an extra tip made of polypropylene.

*Properties*

Length (mm):	210
Weight (kg):	0.4
Diameter (mm):	50
