

*The air purifiers*

# Extractor tube, anodised alu, diam. 75, antistatic

*Description*

# Extractor tube, anodised alu, diam. 75, antistatic

The nozzle and pipe are made of conductive, chemically resistant polypropylene (PP).  
The suction tip can be positioned directly at the source without obstructing the work process.  
The projection at the suction tip guarantees increased collection efficiency.

*Properties*

Length (mm):	250
Diameter (mm):	75
