Spark latch for FilterCube

The spark latch is build out of a metal housing with many copper sheets inside. Due to the assambly of the sheets the airflow goes through in curves (zigzag). The sparks bounce against the sheets and expire. It´s possible to install the spark latch direct to the filterunit or place it in between the sucktion-ducting. Maintenance is done very easily by taking off the maintenance-cap.

Properties

Width [mm]:	870
Depth [mm]:	507
Length [mm]:	545
Colour:	RAL 9006 (Weißaluminium)
