Product No.: 20035045007

Description

Recirculating air filter attachment for WNA and

The post-filter attachment for the WNA 5000 / 7500 and 5000 / 7500 AL wet cyclone separators extends the existing filtration system with an additional fine dust or HEPA filter stage. While the wet cyclone separators already reliably capture coarse and fine particles through water swirling, the post-filter attachment also safely removes ultra-fine particles and aerosols from the exhaust air.

The post-filter attachment proves particularly valuable when the cleaned air is not discharged outside but returned to the workspace. In this case, it ensures improved air quality and supports a healthier working environment.

Properties

Width (mm):	1,275
Depth (mm):	664
Height (mm):	402
