FilterCase Basic

Description

FilterCase Basic

This small filter system is suitable for processes that produce very little smoke, like for example repair work at jewelers.

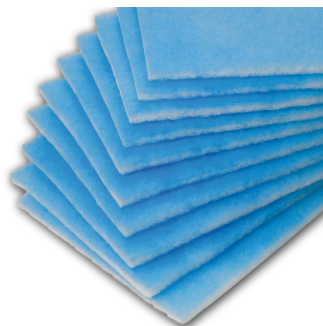

Equipped with 3 filter stages, particles and gasses are separated.

The performance of the system can be adjusted as required with the potentiometer.

Properties

Intake opening (mm):	2 x NW 50 at the rear of the cover (1 x sealed with a blank cover)
Main filter quantity:	1
Volumetric flow (m³/h):	200
max. pressure (Pa):	17,000
Engine power (kW):	0.8
